

RED HOT JULY DAYS
HARD ON THE BABY

July—the month of oppressive heat, red-hot days and scorching nights—is extremely hard on little ones. Children, however, who are not overfed, and who are not over-dressed, and who are not over-protected, will not mind the heat. The mother must be careful not to over-protect her child, and to keep him cool and comfortable. The mother must be careful not to over-protect her child, and to keep him cool and comfortable. ALBERTA CROP
OUTLOOK BEST
LAST 20 DAYS

WINNIPEG, July 8.—The state of the crops in all the provinces is such that, given an all-outlet weather from now until the middle of September, a large crop is pretty well assured, but it will take all of that time to fully insure the maturity of the crops. The report says that the crops are in a very good state of health, and that the outlook is the best for many years.

Glasgow Amateur Singers in
Performance Rameau Opera

Laudable Tendency to Produce Long-Forgotten Opera
Meets With Considerable Success—Perfect
Example of Early Formal Opera

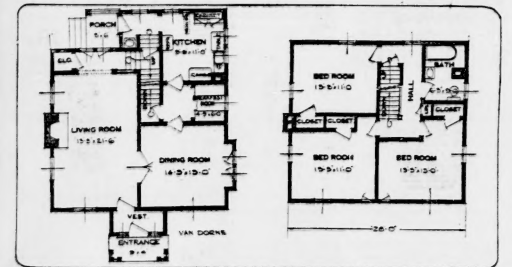

A performance of Rameau's opera, "Les Indes Galles," given recently in Glasgow by a company of amateur singers, has been a success. The opera is a perfect example of early formal opera, and it is a pity that it is not more widely known. The performance was a success, and it is a pity that it is not more widely known.

LONDON IS ALL KEED UP OPERATIC WORK
PLEASES CRITICS

Wolf-Ferrari's opera, "Das Himmelskinder," had its first production at the Munich State Opera house in April. The story is based on the legend of the royal princess of the magic land, who is in love with a prince. The opera is a perfect example of early formal opera, and it is a pity that it is not more widely known.

Home Builders - - -
& Home OwnersThis Modification of Dutch Colonial
Gives a Lot of House For the Money

Here we have a modification of the "van-pool" Dutch Colonial style—a house that is simple and dignified, suited for a small lot, yet giving a lot of house for the money. The house is a two-story Dutch Colonial style, with a gambrel roof and a large chimney. It is a simple and dignified house, and it is a pity that it is not more widely known.

Complete plans and specifications for this building may be ordered from Editor, Home Builders Page, Edmonton Bulletin, 101st St., at "The Van Pool."

FIRM UPWARD WINNIPEG MART

WINNIPEG, July 8.—Continued demand, which was attributed to United States interests, impelled firmness in what quotations on the Winnipeg market. The July option again led the advance with the closing range between 7.4 and 7.4 1/2 above Friday's quotations. Offerings were light.

A limited volume of exporting business was worked to add to the 2 1/2 cent advance of spreading.

A moderate demand existed for barley and oats, while rye and wheat were light. The firmness was inspired by the strength of wheat.

VELIE MOTORS SHOWS REPORT

The Velie Motors Corporation, according to President W. L. Velie, has just passed through one of the most prosperous half-year periods in its history. Velie shipments for the first six months of 1927 increased 27 per cent over those for 1926 and the figures for June are available show comparable gains.

There are particularly pleased with this showing said W. L. Velie, "because we recognize that this is one of the most critical years for sales of the automobile industry has ever known. The total passenger car production in 1927 is estimated at 1,200,000 units. This is more than 50,000 units below the same figure last year. In other words, the industry generally has been down about 15 per cent. Velie sales have increased 27 per cent.

The greatest success of the Velie car this year may be attributed to the fact that the Velie Motors Corporation has never been in a better position than it is today to support the public with the quality of car it demands.

Tiny, Speedy Motor Will Beat Segrave's Record, Says Haugdahl

The car Sig Haugdahl used to break Major Segrave's record will be even faster than this, which he is shown driving.

DAYTONA BEACH, Fla., July 8.—The record made by Major Segrave of 203 miles an hour on the Daytona Beach speedway will be shattered and by a much smaller motor than the Indianapolis used.

This is the opinion of Sig Haugdahl, the Canadian who, himself, set a speed record of 130.2 miles an hour.

"There's never a record that can be broken," says Haugdahl. "I think the only record that can be broken is the one that Major Segrave's car will set. The motor of Segrave's car is being used right now, with one engine on the front axle and two on the rear."

"I'll try to break the world's car speed record. It will be in a car which is about like a car, so small and fast that I will have to be down on the ground when I start."

TO THE COAST THEN RETURN

COAST-TO-COAST AND BACK again: A round trip transcontinental automobile record was hung up Tuesday, June 7, when a Chrysler Imperial "six" sedan, driven by its owner, L. B. Miller, arrived in Los Angeles at 8:30 a.m., 147 hours and 45 minutes out of San Francisco, by way of New York.

The time for the double transcontinental trip was just one minute less than seven days.

Miller started from San Francisco Tuesday, May 31, at 10 a.m. His primary purpose was to establish a round trip American record, but in doing so he also broke the one-way transcontinental automobile record, which he himself had made last August. He arrived in New York Friday, June 2, having driven the 3843 miles of the Lincoln Highway in 23 hours and 44 minutes. This was three hours and 17 minutes faster than he covered the same route last year.

Not content with this breaking all one-way transcontinental records, Miller went on to New York in one minute no longer than was needed to get to the city. He was then started to verify his arrival at 8:45 p.m. at the Hotel New Yorker. When he was on his way back to the coast, he took a slightly longer way of the Lincoln Highway, and covered a distance of 3324 miles. He reached Los Angeles at 8:40 a.m. 23 hours and 44 minutes out of New York.

"I never knew until I got a car," said the driver, "that profits were so great."

"Who, you mean much of it on the road?"

"No," replied the driver, "because I'm a hobbyist. I jump into a car and I'm out."

WILLYS SALES ARE WONDERFUL

An astonishing number of special representatives for the Willys cars in Canada's largest manufacturing plant, the Willys Corporation, Ltd., in London, Ontario, have been successful in selling more Willys cars in the first six months of 1927 than in the same period of 1926.

This year Willys-Overland, Ltd., has secured a position in the motor car market in Canada and throughout the British Empire, and the United States, which has been made possible by making big gains in the right direction.

Starting with January 1st, 1927, they increased their production over the preceding January by an 80 per cent increase over the same period of 1926. The sales of the Willys cars in the first six months of 1927 have been made each month ahead of February of 1926.

Similar gains have been made each month since January 1st, 1927, and the total production for the first six months of 1927 has been 4,470 cars, as compared with 3,000 cars for the same period of 1926.

A review of the facts indicates the steady progress Willys-Overland is making. In 1926 they had a 40 per cent increase over 1925 and in 1927 a 40 per cent increase over 1926.

Triumph is what's left in the minds of the moment as we're driven about in the new Willys cars. They are new and sporty and again, the motor is quiet, powerful and flexible.

But that doesn't tell the story. What we want is a car that will do for us every day, in all the emergency, and that will be the car that we will have in more for the future. Taking the car out on Sunday for a trip doesn't give it the test it needs. The car must be able to stand up on work days. Or taking a long trip with it is a nice convenience, without the bother of frequent stops, road traffic, local speed laws, and other possibilities of delay, and the kind of road that would prove a car for general, everyday use.

Professor (after lecture) "Are there any questions?"

"Yes, sir, how do you estimate the power in a donkey?"

"No, sir, I don't know."
